**Office Action Summary**

<b>Application No.</b> 10/699,799	<b>Applicant(s)</b> HIRAGUCHI, KAZUO	
<b>Examiner</b> Scott Haugland	<b>Art Unit</b> 3654	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1)  Responsive to communication(s) filed on \_\_\_\_\_.
- 2a)  This action is **FINAL**.
- 2b)  This action is non-final.
- 3)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clearly set forth in the claims that the peripheral walls recited in claim 1, lines 3 and 4 and claim 11, lines 4 and 5 are the same elements.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over LeNoue et al (U.S. Patent No. 5,328,123) in view Maehara (U.S. Patent No. 4,466,585).

LeNoue et al discloses a recording tape cartridge comprising a substantially rectangular case formed from an upper case and a lower case each having a wall 72 connected to a ceiling or floor plate (upper or lower wall). The case accommodates a single reel on which recording tape is wound. Border portions between the walls 72 and the ceiling/floor plates are thinner than the plates. The depth of the grooves 74 forming

Art Unit: 3654

the thinner border portions are 30% to 50% of the thickness of the ceiling or floor plate (col. 4, lines 9-12).

LeNoue et al does not disclose screw bosses on the upper and lower cases each having a convex portion and a concave portion which fit together.

Maehara teaches providing a recording tape cartridge with screw bosses 18, 20, 27, 29, 32, 34 having convex portions and concave portions that fit together.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the recording tape cartridge of LeNoue et al with screw bosses having convex portions and concave portions that fit together as taught by Maehara to secure the upper and lower case together while ensuring proper alignment of the cases before insertion of the screws. The walls 72 of LeNoue et al are seen to be peripheral walls since they are located in peripheral portions of the cartridge.

With regard to claims 2, 7-10, 12, and 17-20, the border portions disclosed by LeNoue et al would be 70% to 50% of the thickness of the ceiling or floor plates based on the disclosed groove depths of 30% to 50% of that thickness. Since the walls 72 are disclosed as being substantially the same thickness as the ceiling and floor plates, the same groove depth/border depths relative to the thickness of the walls would have obviously been appropriate.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okamura et al (U.S. Patent No. 4,438,860) is cited to further

Art Unit: 3654

show a tape cartridge having thinner wall portions adjacent intersecting walls. Takagi et al (U.S. Patent No. 4,463,918), Tanaka et al (U.S. Patent No. 4,734,812), Sato (U.S. Patent No. 4,831,482), Goto (U.S. Patent No. 5,075,811), Rambosek et al (U.S. Patent No. 5,440,439), and Kutsukake et al (U.S. Patent No. 5,585,988) are cited to show bosses for securing cartridge halves having convex and concave portions that fit together.
